

# Abraham Torres

Senior Software Engineer - JavaScript Expert NodeJs/ReactJs/ReactNative

## Bio

Age: 32

Email: luisabrahamtl\_2@outlook.com

Phone: +52 4773991512

Address: León, Guanajuato, México

## About Me

Hello! I'm Abraham Torres. I am a skilled Fullstack Javascript developer with plenty of coding and leadership experience. I have worked in more than 20 projects in my entire career. The last 7 of them as a technical leader / software architect.

I have lead teams from 3-5 developers to teams of 20 developers/qa/ui-ux personnel. I have experience working with remote teams, I worked in the United States, United Kingdom and currently in México.

## Professional Skills

- NodeJs
- ReactJs/React Native
- HTML/CSS
- Microservices with AWS
- CI/CD
- Databases
- Scrum
- Software Management

## Work Experience

### CTO at RTA Software

Nov, 2020 - Jan, 2023

At this startup, I oversaw recruitment, technical and financial leadership throughout the company's projects. During this time, I lead 4 teams of 15 developers to deliver a React Native Application, a microservice api collection deployed to AWS, a .NET web api app deployed in both on-premise and Azure and, lastly a ReactJs control panel app deployed on client's servers (on-premise).

I had to review & approve every single pull request that came into the code repositories, and, of course, since this was a startup, I also had to personally fully participate and help in coding work, which I loved.

**Tech Stack: React Native, Node JS, .NET, React JS, Postgres, MSSQL, Bitbucket Pipelines, AWS Lambda, JIRA scrum/kanban**

### Senior Software Engineer at Unosquare

June, 2013 - Nov, 2020

Spent 7 years in this company, started in JavaScript stack with Angular 1x and moved into ReactJS and NodeJS after a couple of years. I was technical leader in the UK Branch for 3 years on-site.

Healthcare and financial software projects were the main where I participated as technical leader.

**Tech Stack: ReactJS, Docker Containers, AWS ECS, SQS, SNS, Jenkins Pipelines, NodeJS, AWS CloudFormation**

### Junior Software Engineer at Synergy Systems

Jan, 2012 - Feb, 2013

Typical junior dev stuff, CSS, HTML, bug fixing.
